Discount (premium)	7.7%
Historic net yield <sup>†</sup>	3.5%
Active Options Exposure <sup>†</sup>	1.6%

## PERFORMANCE

### Cumulative performance over periods to 31 August 2018

	One month	Three months	Six months	One year	Three years	Five years
Share price	0.6%	5.6%	6.2%	5.5%	48.2%	46.7%
NAV	0.6%	5.4%	8.2%	6.9%	53.5%	60.1%
Peer group <sup>^</sup>	1.0%	6.0%	8.5%	6.5%	60.4%	77.7%

<sup>^</sup>On 1 June 2016 Securities Trust of Scotland changed from benchmarking performance against the MSCI World High Dividend Yield index to an unconstrained strategy measured against the performance of the median of the peer group described below. Performance is shown in the table above against this new peer group across various time periods for illustrative purposes only. Prior to adopting a global mandate on 1 August 2011 the company's benchmark was the FTSE All-Share index.

The peer group consists of the AIC Global Equity Income sector combined with actively managed ICVC, SICAV or OEIC funds from Lipper Global - Global Equity Income sector. Performance is measured against the median of this peer group.

### 12-month performance

	To end Q2 2018	To end Q2 2017	To end Q2 2016	To end Q2 2015	To end Q2 2014
Share price	2.6%	19.4%	16.9%	(4.2%)	(1.6%)
NAV	4.5%	16.6%	17.9%	0.8%	5.4%

### Past performance is not a guide to future returns.

Source: Martin Currie. The NAV basis used is cum-income in £. Please note prior to July 2017 the NAV basis used was ex-income NAV in £. Ex-income NAVs exclude current-year income, while cum-income NAVs include current-year income. These figures do not include the cost of buying and selling shares in an investment trust. If these were included, performance figures would be reduced.

## MANAGER'S COMMENTARY

Global equities rose during the month in sterling terms, with the MSCI ACWI index up 1.8%. Of the larger markets, North America was the top-performing region, while Europe and emerging markets were the weakest. By sector, IT and healthcare performed the best, while energy and materials fell the most.

The company's NAV rose 0.6% over the month.

At a portfolio level, in absolute terms, the top three contributors were all IT stocks. Apple added the most to performance, following strong quarterly results released on 31 July, which beat consensus expectations and helped the company push through the US\$1 trillion market capitalisation barrier. Microsoft, similarly enjoyed tailwinds following a very impressive set of numbers and hopes of a significant increase in its dividend. Taiwan Semiconductor also gained on strong results, which allayed market fears of a slowdown related to smartphone weakness.

On the other side, German automotive manufacturing company Continental was

the largest detractor on a second profit warning, which led to further negative revisions and concerns regarding execution. Chinese pharmaceutical firm Shanghai Fosun was also weak due to allegations of substandard manufacturing processes at a plant in China and disappointment around its cost control after quarterly results. US tobacco business Philip Morris was also subdued without any incremental news, but some deterioration in sentiment for the stock occurred after brokers speculated that the company is losing market share.

In terms of portfolio activity, we bought leading global supplier of vacuum valves and vacuum components VAT Group and sold Australian medical laboratory business Sonic Healthcare.

Mark Whitehead

**\*For further information on Options please refer to Important Information overleaf.**

<sup>†</sup>The risk outlined at the end of this document relating to gearing is particularly relevant to this company but should be read in conjunction with all warnings and comments given.

<sup>†</sup>Source for historic yield: Martin Currie as at 31 August 2018. The historic yield reflects dividends declared over the past 12 months as a percentage of the mid-market share price, as at the date shown. Investors may be subject to tax on their dividends.

## IMPORTANT INFORMATION

This information is issued and approved by Martin Currie Investment Management Limited. It does not constitute investment advice. Market and currency movements may cause the capital value of shares, and the income from them, to fall as well as rise and you may get back less than you invested. Please note that, as the shares in investment trusts are traded on a stockmarket, the share price will fluctuate in accordance with supply and demand and may not reflect the value of underlying net asset value of the shares.

Depending on market conditions and market sentiment, the spread between purchase and sale price can be wide. As with all stock exchange investments the value of investment trust share purchases will immediately fall by the difference between the buying and selling prices, the bid-offer spread. The value of investments and the income from them may go down as well as up and is not guaranteed. An investor may not get back the amount originally invested.

Investment trusts may borrow money in order to make further investments. This is known as 'gearing' and can enhance shareholder returns in rising markets but, conversely, can reduce them in falling markets.

The majority of charges will be deducted from the capital of the company. This will constrain capital growth of the company in order to maintain the income streams.

The company employs an active but tactical options strategy by using derivatives, predominantly writing (selling) puts and covered calls for investment purposes, this being principally to generate income. This may be at the expense of generating capital gains.

A sold put option obligates an investor to take delivery, or purchase shares, of the underlying stock at a specified price within a specified time in return for receiving the payment of a premium.

Any use of derivatives for efficient portfolio management and options for investment purposes will be made on the basis of the same principals of risk spreading and diversification that apply to the company's direct investments.
