PERFORMANCE

Cumulative performance over periods to 31 October 2018

	One month	Three months	Six months	One year	Three years	Five years
Share price	(5.9%)	(6.1%)	(1.2%)	(1.2%)	34.2%	28.3%
NAV	(6.1%)	(6.4%)	0.9%	(1.5%)	40.0%	41.3%
Peer group [^]	(4.5%)	(3.7%)	1.9%	1.0%	38.8%	53.3%

[^]On 1 June 2016 Securities Trust of Scotland changed from benchmarking performance against the MSCI World High Dividend Yield index to an unconstrained strategy measured against the performance of the median of the peer group described below. Performance is shown in the table above against this new peer group across various time periods for illustrative purposes only. Prior to adopting a global mandate on 1 August 2011 the company's benchmark was the FTSE All-Share index.

The peer group consists of the AIC Global Equity Income sector combined with actively managed ICVC, SICAV or OEIC funds from Lipper Global - Global Equity Income sector. Performance is measured against the median of this peer group.

12-month performance

	To end Q3 2018	To end Q3 2017	To end Q3 2016	To end Q3 2015	To end Q3 2014
Share price	7.8%	10.0%	31.4%	(7.1%)	0.5%
NAV	8.3%	12.2%	27.6%	(3.6%)	5.8%

Past performance is not a guide to future returns.

Source: Martin Currie. The NAV basis used is cum-income in £. Please note prior to July 2017 the NAV basis used was ex-income NAV in £. Ex-income NAVs exclude current-year income, while cum-income NAVs include current-year income. These figures do not include the cost of buying and selling shares in an investment trust. If these were included, performance figures would be reduced.

MANAGER'S COMMENTARY

Global equities fell during the month, the MSCI ACWI down 5.6% in sterling terms. All regions saw a decline over the period, with Pacific ex Japan the worst performing. Utilities was the only sector to finish the period in positive territory, while industrials fell the most.

At a portfolio level, US pharmaceutical Merck was the most notable contributor to absolute returns. It delivered decent third-quarter results and showed further evidence it is taking more market share in the US lung cancer market. US consumer goods multinational Procter & Gamble also fared well, it saw accelerated organic sales growth in the first quarter of the fiscal year (and the strongest growth in five years). Tobacco name Philip Morris was also a key positive, strong quarterly results reflecting market-share gains in its conventional cigarette portfolio, while its IQOS (electronic cigarettes) have also seen steady development.

On the other side, Dutch health, materials and nutrition company DSM was the main detractor despite a decent set of results showing good progress in its nutrition

business. The stock was impacted by market fears over any business where there is an element of cyclicality (such as DSM's materials division). US petrol firm Occidental also fared badly. Part of the weakness in the stock can be explained by the non-renewal of a project in Qatar that the company is involved in. French energy management company Schneider Electric was another notable negative and was sold over the month.

In terms of portfolio activity, we bought French food-products company Danone and US aerospace and defence firm Lockheed Martin. In addition to Schneider Electric, we sold US manufacturing conglomerate 3M, Dutch paints and performance coatings producer Akzo Nobel, UK packaging firm DS Smith, US-listed International Paper, Canadian financial Manulife and Swiss industrials manufacturer VAT Group.

Mark Whitehead

MANAGER'S BIOGRAPHY

Mark joined Martin Currie as Head of Income in November 2015. He manages Securities Trust of Scotland and co-manages the Martin Currie Global Equity Income strategy. Previously, Mark worked at Sarasin & Partners where he constructed and managed a range of income, balanced, growth, and absolute return portfolios; he became Lead Manager for their thematic funds in the Global Dividend Range in 2007, and latterly was appointed Head of Equity Income from 2010. Before Sarasin & Partners, he was a portfolio manager at stockbroker Capel Cure Sharp. Mark started his investment career at NatWest Stockbrokers in 1998 and is a member of the Chartered Institute for Securities & Investment (CISI).

WEBSITE

The company has its own website at www.securitiestrust.com. There you will find further details on Martin Currie, daily share prices (and associated risks), and you can access regular videos by the manager.

IMPORTANT INFORMATION

This information is issued and approved by Martin Currie Investment Management Limited. It does not constitute investment advice. Market and currency movements may cause the capital value of shares, and the income from them, to fall as well as rise and you may get back less than you invested. Please note that, as the shares in investment trusts are traded on a stockmarket, the share price will fluctuate in accordance with supply and demand and may not reflect the value of underlying net asset value of the shares.

Depending on market conditions and market sentiment, the spread between purchase and sale price can be wide. As with all stock exchange investments the value of investment trust share purchases will immediately fall by the difference between the buying and selling prices, the bid-offer spread. The value of investments and the income from them may go down as well as up and is not guaranteed. An investor may not get back the amount originally invested.

Investment trusts may borrow money in order to make further investments. This is known as 'gearing' and can enhance shareholder returns in rising markets but, conversely, can reduce them in falling markets.

The majority of charges will be deducted from the capital of the company. This will constrain capital growth of the company in order to maintain the income streams.

The company employs an active but tactical options strategy by using derivatives, predominantly writing (selling) puts and covered calls for investment purposes, this being principally to generate income. This may be at the expense of generating capital gains.

A sold put option obligates an investor to take delivery, or purchase shares, of the underlying stock at a specified price within a specified time in return for receiving the payment of a premium.

Any use of derivatives for efficient portfolio management and options for investment purposes will be made on the basis of the same principals of risk spreading and diversification that apply to the company's direct investments.
